

# PRIMA | STONE

SUPER FORMAT MARBLE TILE  
THIN. STRONG. SIMPLE.

# THIN

Sourced from the ranges of Europe and Asia, Prima Stone is a **100% natural, super format tile** created of marble, travertine or onyx.

Prima Stone has **10mm profile and weighs only 3lbs** per sq. ft.

Our in-stock material is cut in series and is available in **book-matched pairs!**

# STRONG

Prima Stone is cut and **applied to fibreglass or aluminum composite backing** creating a tile with an impact and **flexural strength** rating that is over **10 times greater** than slab or porcelain tile.

# SIMPLE

Prima Stone was designed to be cut and installed by a tile setter, **reducing installation time and cost.**

*“ There is something powerful about owing and appreciating a piece of mountain.”*

## COMPOSITE PANELS

### STONE

A 5mm sheet of 100% natural marble, onyx, or travertine.

### COMPOSITE

One layer of PVC and two layers of aluminum for greater flexibility and pressure resistance without breaking.

## TRANSLUCENT PANELS

### STONE

A 5mm sheet of 100% natural marble or onyx.

### FIBREGLASS

A 5mm sheet of fibreglass for a stronger yet semi-transparent look.
